ABOUT US

Little Italy Forni has specialized in the installation of pizza ovens for over 10 years. We have a very wide range of products and together we will choose the ideal oven to meet all your needs. In addition to the installation of the oven, we also take care of the interior design of your pizzeria.

The prices in this catalogue include <u>transport</u> and <u>installation</u> of the oven, <u>excluding VAT</u>.

The color of the oven is not included in the price.

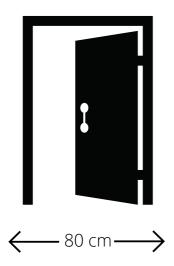

All models are assembled on site and can be brought in through any door.

We can also supply you with pizzeria accessories, from pasta machines to pizza shovels.

All models are assembled on site and can therefore be brought in through any door.

In one day your oven is fully installed and ready to use (extra day for personalized finish).

We install ovens all over Belgium.

Since 1969, Pavesi Forni Modena has been involved in the production and laying of refractory and insulating materials on ceramic, glass and foundry ovens.

Thanks to the acquired know-how, Pavesi Forni Modena has been building professional wood and gas ovens in Italy for pizzerias and bakeries and has been marketing them all over the world for over 30 years

Each Pavesi oven comes from the Italian tradition and their long experience of craftsmanship.

All ovens are built entirely by hand using the highest quality materials in order to ensure stability and the control of each element.

Every single oven is made to last, to ensure the best performance and obtain excellent energy saving.

Finishing options (color, mosaic) for all Pavesi ovens can be found on **page 52**.

JOY 60TW GAS FRONT

With its rotating plate of 62 cm in diameter, its small size (80 cm) and high-performance materials, the professional Joy 60 TW can reach temperatures exceeding 400 ° C, thanks to its built-in gas burner. In addition to baking pizzas it's possible to cook artisanal bread, succulent roasts or stews, and this all in the space you would usually occupy with a coffee table.

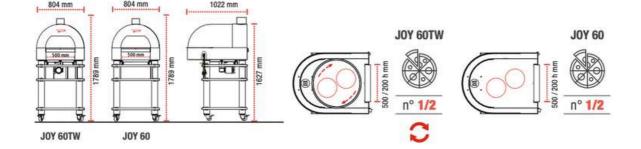

Available in endless customizable colors. The revolving Joy 60 TW oven allows the pizza maker to devote himself to only preparing the pizzas, since those already in the oven do not need to be turned.

JOY 60TW gas € 6 710

Inside dimensions	60 x 70 cm
Weight	250 kg
Dome thickness	steel
Cook Top - Cover Distance	32 cm
Cook top height from ground	121 cm
Base Insulation Thickness (Microporous Panels)	10 cm
Dome Insulation Thickness (Kaolin Blanket)	12 cm
Chimney Flue Ø	12 cm
Smokes temperature at the vent	300 ° - 25 g/sec (50m3/Hr)
Static pressure	12 Pa
Monoblock Cooking Plate	Burner drago P1
Thermal Potential	min. 6 - max. 15 Kw
Thermal Potential	min. 5 000 - max. 13 000 Kcal/h

Gas Flow Nat. Gas	min. 0,63/0,20 max. 1,58/0,54 Nm3/h
Gas Coupling	1/2 inches
Weight	4 kg

JOY 90TW GAS FRONT

Baking surface diameter of 90 cm., Pavesi ROTATING SINGLE BLOCK, capacity for 2/3 pizzas.

The rotating floor bakes pizza and other dishes perfectly, without moving the food in the oven. It achieves the complex flavors that are only possible with a traditional oven, with the convenience of gas.

The revolving Joy 90 TW oven was made with a one-torch electronic burner, with high and low flame, adjustable in six different positions.

JOY 90TW gas € 13 200

TWISTER GAS

- ROTATING MONOBLOCK auto-dilating baking surface of 130 cm.
- Central back gas fired
- Single opening 56x27 cm
- Uniform heat distribution
- Production capacity that can exceed 160 pizzas / hour and 400 pizzas baked in succession (data gathered directly from pizza restaurants)

Anyone will be able to work in front of the oven and dedicate themselves entirely to preparing pizza. The Twister Gas is the extra help that everyone would love in their restaurant:

- Extremely simple to use
- Maximum hygiene
- Power consumption kept to a minimum
- Maximum space optimisation
- Excellent baking characteristics

All the Pavesi gas-fired ovens are supplied with an electronically managed gas burner

PVP 110 TW GAS

- ROTATING SINGLE BLOCK Pavesi Baking surface diameter of 110 cm.
- Capacity for 8/10 pizzas
- FLAT VAULT
- Square chamber with refractory cement walls
- Single 56x27 opening
- Heats from 100° C. to 300° C. in approx. in 40 minutes (data measured using 34 KW/h Methane Gas Burner and 20 cm. insulated flue).

A small yet extremely reactive oven.

We prefer not to indicate the hourly production rate, as it is linked to many factors other than the oven specifications, such as the production capacity of the staff and the work area. It's up to you to find out. You'll be surprised.

All the Pavesi gas-fired ovens are supplied with an electronically managed gas burner.

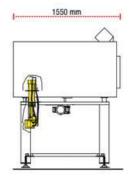

PVP 110 TW gas € 17 000

Gas flow nat. gas	min. 0,63/0,20 max. 3,59/1,22
Gas coupling	1/2 inches
Weight	8 kg
Electrical power supply	230 V monophase
Consumption burner	100 W
m2 mosaic (option)	4m2

RPM 120 WOOD/COMBO

Small yet has the capacity to bake 4/5 pizzas with either wood or gas. This MONOBLOCK auto-dilating baking oven is ideal for restaurants seating a max of 40/50 people or for anyone who simply wants to provide its clients with an added service without losing too much space.

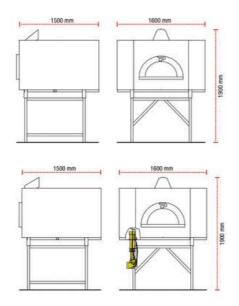

RPM 120 wood	€ 7 640
RPM 120 gas	+ burner D2 € 2 400

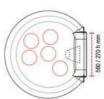

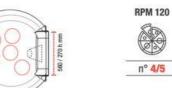

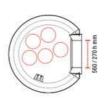

Inside Dimentions	120 x 115 cm
Weight	1100 kg
Dome Thickness	8/10 cm
Cook Top - Cover Distance	42 cm
Cook top height from ground	122 cm
Base Insulation Thickness (Microporous Panels)	15 cm
Dome Insulation Thickness (Kaolin Blanket)	10 cm
Chimney Flue Ø	20 cm
Smokes temperature at the vent	300 ° - 25 g/sec (50m3/Hr)
Static pressure	12 Pa
Monoblock cooking plate	Burner drago D2
Thermal potential	min. 6 - max. 34 Kw
Thermal potential	min. 5 000 - max. 29 200 Kcal/h

Gas pressure nat. gas	min. 7/20 max. 25/50 mbar
Gas flow nat. gas	min. 0,63/0,20 max. 3,59/1,22
Gas coupling	1/2 inches
Weight	8 kg
Electrical power supply	230 V monophase
Consumption burner	100 W

RPM 140 WOOD/COMBO

MONOBLOCK auto-dilating oven that's perfectly circular. It has a maximum capacity between 6 and 8 pizzas, both wood and gas fired. Production capacity of over 100 pizzas/ hour. This oven guarantees the highest productivity at very low cost.

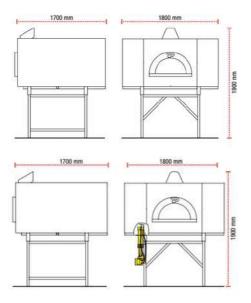

RPM 140 wood	€ 7 830
RPM 140 gas	+ burner D2 € 2 400

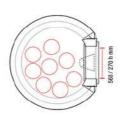

Inside Dimentions	140 x 135 cm
Weight	1250 kg
Dome Thickness	8/10 cm
Cook Top - Cover Distance	42 cm
Cook top height from ground	122 cm
Base Insulation Thickness (Microporous Panels)	15 cm
Dome Insulation Thickness (Kaolin Blanket)	10 cm
Chimney Flue Ø	20 cm
Smokes temperature at the vent	300 ° - 25 g/sec (50m3/Hr)
Static pressure	12 Pa
Monoblock cooking plate	Burner drago D2
Thermal potential	min. 6 - max. 34 Kw
Thermal potential	min. 5 000 - max. 29 200 Kcal/h

Gas pressure nat. gas	min. 7/20 max. 25/50 mbar
Gas flow nat. gas	min. 0,63/0,20 max. 3,59/1,22
Gas coupling	1/2 inches
Weight	8 kg
Electrical power supply	230 V monophase
Consumption burner	100 W

RPM 140/160 WOOD/COMBO

Capable of cooking up to 11 pizzas, both wood and gas fired, MONOBLOCK auto-dilating baking surface.

Identical power consumption as the 140 model, but with a greater productivity (one can easily produce more than 120 pizzas / hour.)

Ideal for large restaurants or pizzerias whose work load is concentrated in a few hours. Excellent for giant pizzas with a diameter of over 40 cm.

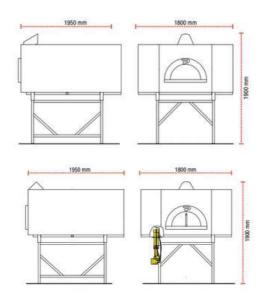

RPM 140/160 wood	€ 8 400
RPM 140/160 gas	+ burner D2 € 2 400

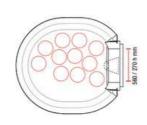

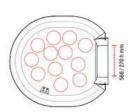

Inside Dimentions	140 x 155 cm
Weight	1400 kg
Dome Thickness	8/10 cm
Cook Top - Cover Distance	42 cm
Cook top height from ground	122 cm
Base Insulation Thickness (Microporous Panels)	15 cm
Dome Insulation Thickness (Kaolin Blanket)	10 cm
Chimney Flue Ø	20 cm
Smokes temperature at the vent	300 ° - 25 g/sec (50m3/Hr)
Static pressure	12 Pa
Monoblock cooking plate	Burner drago D2
Thermal potential	min. 6 - max. 34 Kw
Thermal potential	min. 5 000 - max. 29 200 Kcal/h

Gas flow nat. gas	min. 0,63/0,20 max. 3,59/1,22
Gas coupling	1/2 inches
Weight	8 kg
Electrical power supply	230 V monophase
Consumption burner	100 W

RPM 140/180 WOOD/COMBO

The largest of our standard range of ovens, both wood and gas fired, MONOBLOCK auto-dilating baking surface.

Can cook up to 16 pizzas with staggering productivity levels (it can even cook as many as 150/160 pizzas / hour.) Ideal for the production of pizza by the meter. Compared to other ovens with similar baking surface dimensions, it is very small and uses very little power.

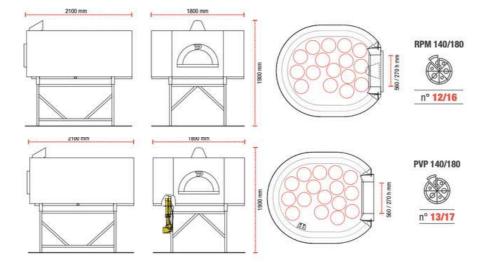

RPM 140/180 wood	€ 8 960
RPM 140/180 gas	+ burner D2 € 2 400

Inside Dimentions	140 x 175 cm
Weight	1550 kg
Dome Thickness	8/10 cm
Cook Top - Cover Distance	42 cm
Cook top height from ground	122 cm
Base Insulation Thickness (Microporous Panels)	15 cm
Dome Insulation Thickness (Kaolin Blanket)	10 cm

Full list of RAL-colors available upon request.

For 70 years, Zanolli has designed and manufactured ovens and machines for pizzerias, pastry shops and bakeries. Traditional Italian ingenuity and attention to the very latest technology make Zanolli a guarantee of 100% Italian excellence both in Italy and abroad, as well as one of the best established companies in the sector.

Thanks to an extensive network of distributors and retailers, Zanolli exports all over the world applying same care and attention as within its Italian home territory.

The superior quality of the Zanolli models is also ensured by a certified production process as well as dialogue with customers and professionals and is perfected by the extensive training provided by the company.

SYNTHESIS

Synthesis is a revolutionary modular tunnel oven. After you have:

- programmed the correct temperature
- determined the movement speed of the conveyor
- prepared your recipe
- placed it on the conveyor

you can focus on something else! After all, there is no need to monitor the product while it is cooking, as the oven itself pushes it away from the heat to prevent burning. Synthesis can cook pizza, grilled vegetables, gourmet or pastries.

All Synthesis ovens are stackable therefore making it possible to multiply productivity (in the same space) during peak hours. In case of reduced productivity, it is possible to use only one cooking module, which results in significant energy savings.

Maximum temperature of 320 °C, more than enough for a perfect baking result thanks to the ventilation system.

The new ECONOMY function is the ideal solution to keep the oven warm between baking sessions, avoiding the loss of energy and time due to the normal cooling temperature drop of the oven.

CITIZEN PW

The Citizen PW electric oven is suitable especially, but not only, for baking pizza. With the standard steam release valve, you can also cook other recipes. Depending on your specialty, you can make round pizzas, pizzas on plate, as well as all specialties of gastronomy. You can choose between the one- or two-room version and build the oven according to your production requirements with the additional possibility of placing up to 3 modules side by side.

The Citizen is truly complete in the electromechanical model with the digital version. In addition to the temperature control and the differentiated setting of the vault and the floor, you can program the ignition of the cooking space on any day of the week and choose from 9 available cooking cycles that you want to activate.

Keeping consumption and protection of the environment in mind, the oven is equipped with an "economical" energy saving regime, which reduces the immediate consumption by half when the production cycle allows it.

You can now choose to fully coat the baking chamber with refractory material and equip your oven with a reinforced resistance kit to obtain extreme performance.

AVGVSTO

The new Zanolli dome oven combines the traditional aesthetic with the ease of using electric ovens, guaranteeing high performance. It is available in the version for 6 or 9 pizzas, maximum temperature 500 °C and baking chamber completely covered with refractory ceramic

General technical properties:

- Maximum temperature 500°C (reached in only 90 minutes)
- LED interior lighting
- Stone wool thermal insulation for high temperatures
- Cooking chamber fully lined with refractory ceramic
- Antique door keeps the heat inside the chamber after cooking
- Refractory bottom: thickness 3 cm
- Cooking chamber height: 12,5 cm
- 45 cm antique black granite support
- 15 cm d fitting prepared for easy connection to central exhaust system
- Armoured heating elements
- Lacquered base, mounted on wheels or feet
- Oven dismountable in 5 macro parts for a comfortable installation
- Electric versions for 6 and 9 pizzas (gas since 2020)

Control panel

- Electromechanical controls concealed by slide cover
- Electronically displayed temperatures
- Self-diagnostics with error message display
- Independent adjustment of the temperature of the oven top and bottom with dual probe (maximum temperature 500°C reached in just 90 minutes)
- Independent adjustment of the power of the oven top and bottom (scale 0-100%)

- *When placing the order, it is possible to request that AVGVSTO is shipped disassembled in two special packages

TEOREMA POLIS

The key word is versatility. If you can't find the variant you are looking for, you can create it with Teorema Polis for all types of use: pastries, bakeries and pizzerias.

You can choose from different baking chamber heights:

18 cm for baking pizzas or small pastries

30 cm for baking bread, pandoros or panettones

You can choose whether to cook on a plate or directly on the oven floor, and in this case you choose the bottom of the refractory baking chamber. Depending on your needs, you can add a fermentation chamber to your oven.

With the new digital control panel with electronic map of 20 programs, you can do the following:

- Activate the PRE HEATING function, which allows you to preheat the oven quickly or slowly.
- Activate the AUTO CLEANING function with which the baking chamber can be cleaned / disinfected.
- Activate the weekly scheduled ignition, with the possibility of two ignitions.
- Switch on daily.

There is no shortage of accessories. To make the oven even more efficient, Zanolli offers the vaporizer for the baking chamber and the humidifier for the fermentation chamber.

JOY 90

This monoblock auto-dilating baking oven is recommended for restaurants seating a maximum of 20 people or for anyone who simply wishes to give an extra service to the customers without losing space. It's also ideal for baking pizza at home or in the garden with the help of a professional oven.

Exceptional performance, compact size, power consumption in line with our traditional ovens, perfect baking for the entire evening. Designed to provide a working tool of the highest standard but still unique, because it is strongly characterized in terms of aesthetics, almost a piece of design.

Through the installation of the manual Avanzini gas burner, the Joy 90 wood oven can cook also on gas.

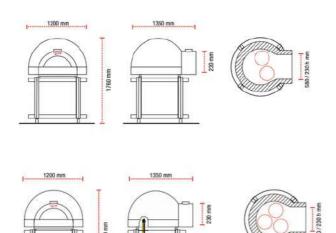

JOY 90 wood	€ 4 620
JOY 90 gas	+ burnerD1 € 2 400

Inside Dimensions	86 x 81 cm		
Weight	300 kg		
Dome thickness	8 cm		
Cook top - cover distance	40 cm		
Cook top height from ground	116 cm		
Base insulation thickness (microporous panels)	10 cm		
Dome insulation thickness (kaolin blanket)	12 cm		
Chimney flue Ø	14,5/15 cm		
Smokes temperature at the vent	300 ° - 25 g/sec (50m3/Hr)		
Static pressure	12 Pa		
Monoblock cooking plate	Burner Drago P1		
Thermal potentional	min. 6 - max. 10 Kw		
Thermal potential	min. 5 000 - max. 13 000 Kcal/h		

Gas pressure nat. gas	min. 15/25 max. 25/50 mbar
Gas flow nat. gas	min. 0,63/0,20 max. 1,58/0,54 Nm3/h
Gas coupling	1/2 inches
Weight	4 kg

DIY WOOD

You have to assemble this oven yourself. It comes as a doit-yourself package. No base or color for the dome is included.

DIY 90 wood	€ 1485
DIY 120 wood	€ 2 750

MACHINES

ROLLER

ROLLER O

The Roller range of pizza base moulders is designed to facilitate the job of even the least experienced pizza maker; this fast and precise machine is the perfect tool to optimize your workflow.

Roller moulders are available in different models to meet the needs of master pizza makers who want either a rectangular pizza for tray baking or the traditional round base. The Roller O uses slanted rollers to produce the classic round pizza base. The moving arm guides and rotates the dough in the direction of the second roller.

The Roller P is designed to roll out tray-bake pizza bases. Time saving and optimal results are guaranteed.

GALASSIA PIZZA

The spiral kneading machines in the Galassia Pizza range are reliable units designed to meet the numerous requirements of modern pizzerias. The high number of tank revolutions per minute allows dough to be processed starting from 55% of water up to higher levels of hydration.

TECHNICAL CHARACTERISTICS:

- Spiral in stainless steel, durable for heavy-duty professional use
- The chain transmission allows for a longer life and greater durability
- The 18 and 25 kg models can have a tilt back head in the Special versions, while the Super version has a tilt back head and removable bowl
- Galassia wheel kit (optional)

ERCOLINA PLUS

The ERCOLINA PLUS range supports you in the sensitive dough-portioning phase. With a single machine, you can make perfectly rounded balls at the exact size you want from a dough mixture.

The machines are available in manual (Ercolina Plus), semi- automatic (Ercolina Plus SA), and Automatic (Ercolina Plus A) versions.

TECHNICAL CHARACTERISTICS:

- The pressing plate and the cutting blades are made entirely of stainless steel
- In the Manual version, the 3 working phases (PRESSING, CUTTING, FORMING) are entirely controlled by you through the use of levers
- In the Semi-Automatic version, the electronic control panel allows 10 different PRESSING and CUTTING programs to be stored, while the ROUNDING phase is managed manually by using a lever
- In the Automatic version all the working phases are completely programmable

Zio Pepe Accessories

Code	Name	Diameter (cm)	Length (cm)	Price
A33	4 stagioni shovel for traditional pizza	33	170	€ 135

A shovel made of a lightweight aluminum alloy suitable for contact with food. The shape and microporosity of the shovel are designed to facilitate the loading/unloading of pizzas without excess flour. The shape of the handle is designed to easily dissipate heat to avoid burning, and offers a better grip and flexibility.

Code	Name	Model	Dimensions (cm) (d - h - l)	Price
AS4	4 stagioni wall support	single- single	8 - 3 - 27	€38

Support for the 4 Stagioni shovel in multi-layered beech, indispensable to place the shovel in a hygienic and functional way.

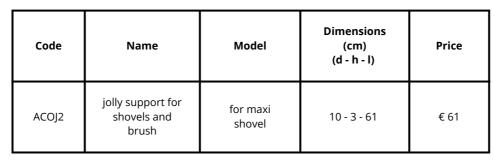

Code	Name	Diameter (cm)	Length (cm)	Price
A35F	4 stagioni perforated shovel	35	170	€ 150

A shovel made of a lightweight aluminum alloy suitable for contact with food. The shape and microporosity of the shovel are designed to facilitate the loading and unloading of pizzas without excess flour. The small triangular holes allow excess flour to drain away. The shape of the handle is designed to easily dissipate heat to avoid burning, and offers a better grip and flexibility.

Beech wall bracket to hygienically and functionally place an in-shovel, cooking shovel and brush, etc.

Code	Name	Diameter (cm)	Length (cm)	Price
AM33FUL	4 stagioni ultralight perforated shovel	33	170	€ 153

A shovel made of a lightweight aluminum alloy suitable for contact with food. The shape and microporosity of the shovel are designed to facilitate the loading/unloading of pizzas without excess flour. The shape of the handle is designed to easily dissipate heat to avoid burning, and offers a better grip and flexibility.

Code	Naam	Weight (gr)	Diameter (cm)	Weight (gr)	Prijs
A20R	stella shovel traditional	1250	20	170	€ 112

Made of stainless steel 18/10 and equipped with two ABS handles, one sliding and with coupling to facilitate the work, with a shield to prevent burns, guarantees stability and safety.

Code	Name	Model	Dimensions (cm) (d - h - l)	Price
	stella shovel wall support	wall part	9 - 3 - 23	
ACO		ground part	10 - 16 - 32	€ 91

Support for one or two Stella multilayer beech shovels, allows correct positioning of the shovels, hygienic and functional. With aluminum support that can be disassembled for cleaning and upper support that can be positioned relative to the left or right handle.

Code	Name	Model	Dimensions (cm) (d x h x l)	Price
ACS2	double free support holder	double support holder	85 x 25 x 165	€ 368

Double free support for two 4 Stagioni and two Stella shovels with white Carrara marble base and stainless steel structure with beech multilay- er shovel supports and aluminum base.

Elegant and practical for shovels. Designed for ovens where it is not possible to attach the supports to the wall.
